2.11.9 If a race cannot be run or re-started at a venue for any reason then at the Organisers entire discretion reasonable attempts will be made to provide a substitute race at another event but the Organisers are not contractually bound to provide such substituted race(s) and no refund of any Registration Fee or Entry Fee shall be payable and with such occurrence of loss of race(s) being deemed force majeure. ## **2.16 TIMING MODULES:**

- 2.16.1 All competitors will be required to fit an Electronic Self Identification Module (Transponder) as per MSA General Regulation Q12.2.1. to their car for the purposes of accurate timing. Holders for these and detailed fitting instructions will be issued with the transponders and it will be the responsibility of the competitor to fit these in the car in the position and manner specified. The Modules must be in place and functioning correctly for all Championship qualifying practice sessions and races. The setting and servicing of these items must only be carried out by properly authorised MSA licensed Timekeepers. Competitors will be charged by the timing company for replacement of the Modules due to misuse or loss at any time during the season.

- 2.16.2 Any competitor who fails to fit a transponder to their car may not necessarily be timed by the official timekeepers for the event at their discretion. In such a case the competitor may start the race from the back of the grid but also may not necessarily feature on the results of the race irrespective of their finishing position.
- 2.16.3 Competitors may not place electronic timing equipment within five metres of the official Start Finish or any other official timing lines at any event or test session/day. Any such equipment placed within these zones will be removed.

## **2.17 SAFETY CAR:**

- 2.17.1 The Safety Car will be brought into operation in accordance with MSA Regulations [Section Q Appendix 2] to neutralise a race upon the sole decision of the Clerk of the Course. The Safety Car will be driven by an experienced circuit driver (in accordance with GR G5) and will carry an observer capable of recognising all competing cars and who is in permanent radio contact with race control.
- 2.17.2 The Safety Car yellow/amber lights illuminated will normally join and exit the circuit from the pit lane and the Safety Car boards will be shown initially from the start-line. If these locations are to be varied specific written instructions and verbal briefings will be issued detailing the exact locations to be used.
- 2.17.3 On the order from the Clerk of the Course the Safety Car will join the circuit with its revolving lights on regardless of where the race leader is.
- 2.17.4 When the order is given to deploy the Safety Car a waved yellow flag and "SC" board will be displayed at the start finish line. The waved yellow flags and "SC" boards will flow around the circuit in both directions as an adjacent post displays both their waved yellow flag and "SC" board. This system may be supplemented by a message being simultaneously broadcast to all marshals' posts if such a communication system is available.
- 2.17.5 Flashing yellow lights may also be used at the start-line and at other points around the circuit.
- 2.17.6 All competing cars when notified of the Safety Car intervention (by the flag signals "SC" boards or by any other means) will reduce speed and line up behind the Safety Car no more than 5 car lengths apart and maintaining the same speed as it. Overtaking or overlapping of any other competing car during a Safety Car intervention is forbidden. Overtaking of a Safety Car is forbidden unless the particular competitor concerned is signalled to overtake the Safety Car by the observer in the Safety Car.
- 2.17.7 When ordered to do so by the Clerk of the Course the observer in the Safety Car will wave past any cars between the Safety Car and the race leader. These cars will continue at reduced speed and without overtaking until they reach the line of cars behind the Safety Car.
- 2.17.8 While the safety car is in operation competing cars may enter the pit lane but may only re-join the track when signalled to do so and not when the safety car and the line of cars following it are about to pass or are passing the pit exit. A car re-joining the track must proceed at an appropriate speed until it reaches the end of the line of cars behind the Safety Car.
- 2.17.9 The Safety Car will remain in operation until at least the majority of competing cars on the circuit are lined up behind it.
- 2.17.10 When the Clerk of the Course calls in the Safety Car it will extinguish the yellow/amber flashing lights prior to exiting the circuit. This would normally be such that a minimum of 25% of a lap for circuits over 2 miles and 50% of a lap for circuits under 2 miles should be completed by the Safety Car with its lights extinguished.
- 2.17.11 Following the safety car extinguishing its lights and prior to passing the green flag the race leader will maintain the pace set by the Safety Car. The race leader will dictate the pace and if necessary fall more than five car lengths behind it. In order to avoid the likelihood of accidents before the safety car returns to the pits from the point at which the lights on the car are extinguished competitors must proceed at a pace which involves no erratic acceleration or braking nor any other manoeuvre which is likely to endanger other competitors or impede the restart.
- 2.17.12 As the Safety Car is approaching the pit entry the green flag will be displayed at the start finish line and the "SC" board withdrawn. Following this display of the start signal yellow flags and "SC" boards at the marshals posts will be withdrawn and be replaced with a waved green flag for one lap. The waved green flag will flow around the circuit in both directions as an adjacent post displays their waved green flag. This

system may be supplemented by a message being simultaneously broadcast to all marshals' posts if such a communication system is available. Overtaking remains strictly forbidden until the start signal at the start/finish line is passed.

- 2.17.13 The first three (3) laps completed under the Safety Car will not be counted as race laps. After the completion of the third intervention lap any further laps undertaken will be counted as race laps.
- 2.17.14 Under certain circumstances the Clerk of the Course may ask the Safety Car to use the pit lane. In this case and provided its yellow/amber lights remain illuminated all cars must follow it into the pit lane without overtaking. Any car entering the pit lane under these circumstances may stop at its designated garage area.
- 2.17.15 The Championship Clerk of the Course may impose a penalty upon any competitor or team who he considers has gained an unfair advantage whether inadvertently or not from a breach of these Safety Car Regulations. In the event that one competitor breaches these Safety Car Regulations for the benefit of another competitor then both may be penalised.

## **2.18 DRIVING STANDARDS:**

- 2.18.1 Any competitor who is reported to be involved in cases of contact which in the opinion of Officials is avoidable may be subject to the following immediate penalties:
- 2.18.2 During practice and / or qualifying: The competitor concerned will be Black Flagged and may be prevented from taking any further part in that session
- 2.18.3 During race: The competitor concerned will be penalised by way of a drive through penalty in accordance with MSA General Regulation Q12.6.
- 2.18.4 A drive through penalty being imposed will be notified by the use of a Black Flag or Black Flag and Penalty Board and must be taken within 3 laps of the notification being given. It will involve the competitor entering the pit lane observing the pit lane speed limit between the 'in' and 'out' control lines and exiting the pit lane to re-join the race without stopping at his / her pit.
- 2.18.5 Failure to comply with the imposition of a drive through penalty will result in the car being black flagged and may result in exclusion from the race in question
- 2.18.6 In the event that a penalty described above cannot be imposed for operational reasons during a race (i.e. within 5 minutes of the end of a race) the competitor concerned may be given a 30 second elapsed time penalty (and relative Licence Penalty Points) as an alternative.

- 2.19.1 Replacement cars may only be permitted with the express permission of the Clerk of the Course and a Championship Coordinator. The presentation of a spare car for scrutineering must be done in accordance with the regulations set out within the current MSA Yearbook.
- 2.19.2 A competitor using a replacement car will incur a 20 point reduction in the Championship points.

Any deduction of Championship points will be five times that of the associated license penalty points. i.e. formal written reprimand 10 points fine or time penalty 15 points exclusion from practice heat or race 20 points exclusion from meeting 30 points.
