CNC HEADS SPORTS/SALOON CHAMPIONSHIP

SPORTING AND TECHNICAL NOTE 03

CLARIFICATION OF HELMET STANDARDS FOR USE WITH AN FHR

To all CNC Heads drivers,

IMPORTANT CLARIFICATION OF HELMET STANDARDS FOR USE WITH AN FHR

If your helmet is a Snell SA 2005 then it MUST have an FIA label on it, usually on the outside, to be used with an FHR from 2016 onwards. Later helmets have this but a lot of older ones do not.

It is a whiteish silver label with the FIA logo and wording to say that 'Helmet tether anchorages fitted by the manufacturer in compliance with FIA standard 8858 2002'. Later SA 2005 helmets may have a similar FIA label with slightly different wording. If it does not have this FIA label it will NOT be accepted at scrutineering.

If you had the helmet posts fitted yourself it is possible that the helmet will not have the FIA label. Many drivers have this spec of helmet so please check!
